A Word from the President

Se-KureControls

For nearly 47 plus years, Se-Kure Controls has been working with retailers to reduce shrinkage caused by shoplifting. Over that time, there has been an explosion of new products in the consumer electronics and fashion-focused softlines industry. Added to this challenge are the increased competitive pressures to reduce costs and staffing.

Whether you are seeking a custom item or a standard product, we strive to keep your costs in line by controlling the manufacturing process. Our three manufacturing plants are devoted to quality and cost effective production. Our team of professionals can take your idea from concept to completion. By keeping the entire process within Se-Kure Controls, we can reduce delivery time, control quality and ensure your satisfaction with the finished product. Our knowledgeable Customer Service Representatives are on hand to answer your questions and assist you with any special requests.

We thank you for your business over the years and for making this edition of our catalog possible. As always, we welcome your comments and ideas and look forward to being your security solutions provider.

Sincerely,

Roger J. Leyden

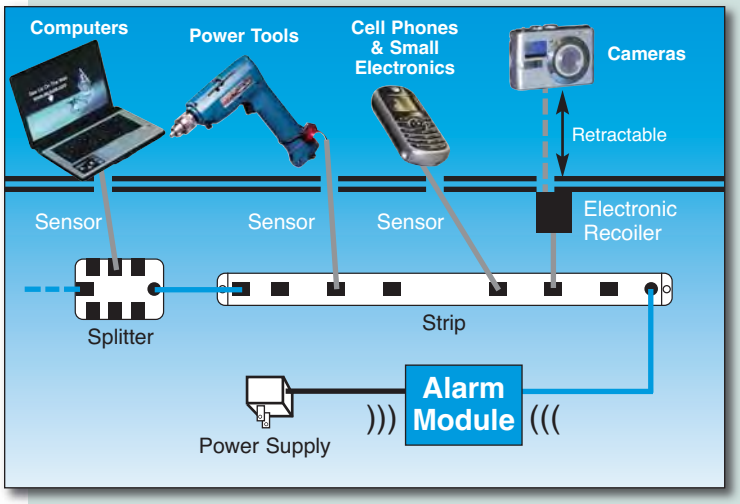
HOW TO SELECT ALARM SYSTEM COMPONENTS



1. Select the Alarm System You Wish to Use.
Consider the number of items you wish to protect, the requirements of your fixtures, etc., and whether you want a key or keypad (or both) to arm the system.

2. Maintain Consistency in the Parts You Select.
Use "ME" Sr. Splitters and/or Strips with an "ME" Sr. System; "LE" Splitters and/or Strips with an "LE" System, and so on.

3. Determine the Number of Splitters/Strips Needed Based on the Number of Items Protected.
Divide the number of items you need to have protected by the number of ports on the Splitter or Strip. Then round up to the nearest whole number.

4. Select the Style & Number of Sensors/Recoilers You Want.
Consider the items to be protected and the surface on which the sensor will attach.

5. Review Your Order.
Make sure that you include a Power Supply, Alarm Module, the correct number of Splitters/Strips and Sensor/Recoilers and needed supplies... (extra adhesives, removal tools, tie-wraps, etc.).

6. Place Your Order.
For questions, or to order, call our **Customer Service Department**: 1-(800) 322-2435, **Fax**: (847) 288-9999 or **E-Mail**: orders@se-kure.com.

SK-80108ME
"ME®" Jr Plus 2 (8) Port Strip

The **"ME®" Junior Plus 2 Alarm System** was designed to provide the latest in anti-shoplifting technology in an Easy-to-Use, cost effective format. It offers the flexibility of using 8-port splitters or strips and the full line of Se-Kure Controls sensors and electronic recoilers. The 8-port splitters/strips help lower system cost by reducing the equipment needed to protect your display merchandise. The **"ME®" Junior Plus 2 Alarm System** does not require shunt plugs in unused ports. The system has two circuits to allow display protection in two different directions from the alarm module, and offers valuable options such as an external horn that can be added in the field. An optional **"Where-It's-At"** Light can be plugged into each splitter or strip to instantly tell you where the tampered sensor is located. The ME® Junior Plus 2 is powered by an AC/DC power supply (purchased separately) and four (4) back-up "C" cell batteries (not included). Convenient, easy-to-read and understand LED's indicate that the AC power is present, Low Battery Alert (audible tone as well), whether the system had been disarmed by key or keypad, and which circuit is open.

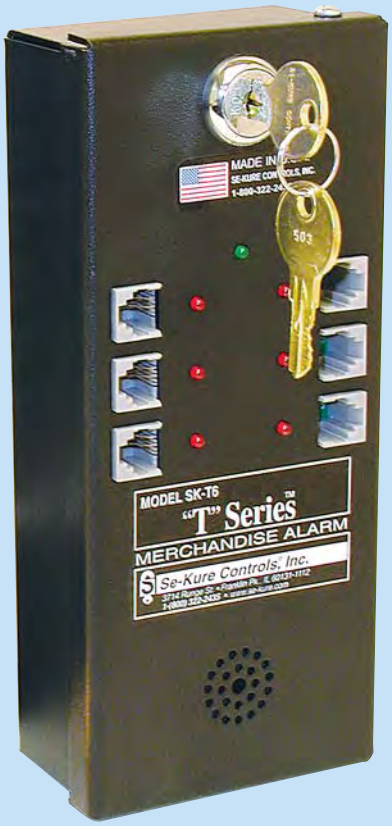
T-SERIES ALARM MODULES

A Self-Contained Display Alarm System



The **T-Series Alarm Modules** are perfect for Specialty Displays, End-Caps, Counter-Tops, or anywhere that you want to protect up to 12 items. Using the newest technology that requires no shunt plugs, these T-Series Alarms include a power supply. Just add any of our sensors or electronic recoilers and your displayed products can be protected quickly and easily. They utilize (6) "AA" batteries (not included) for back-up power. Both can be used where AC power is not available. When a sensor is tampered with, the light on the sensor and the light on the alarm module flash to lead you to the location of the tampered sensor.

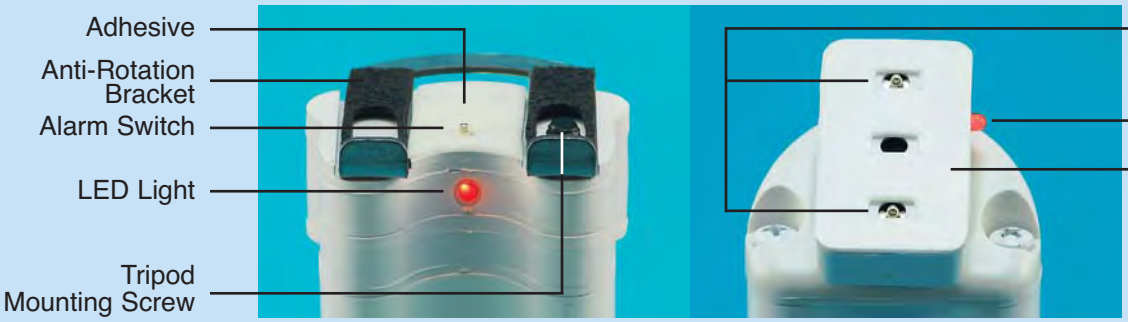
HOW THE VANTAGE II SYSTEM PROTECTS MERCHANDISE



Horizontal Sensor

Angled Sensor

Horizontal Sensor Used For Camera Utilizes:

- Security Switch
- Double-Faced Adhesive
- Anti-Rotation Bracket
- Tripod Mounting Screw
- When Properly Applied, The Switch Is Closed & The Adhesive With The Bracket Prevents Rotation
- For Both Sensors, When Properly Attached To The Displayed Device & Alarm, The LED Light Will Be Illuminated Confirming Protection

Angled Sensor Uses Two (2) Separate Switches To Provide Security

- When The Display Item Is Properly Attached, The Double-Faced Adhesive Holds It In Place
- The Two Switches Are Closed, Enabling Protection On Devices With A Partial Removable Battery Door
- Dual Sensors Would Be Used For Items With A Removable Battery Door That Encompasses The Entire Back Of The Item

ELECTRONIC RECOILERS®

Self-Retracting Systems Eliminate Cord Clutter

The **Electronic Recoiler®** is a unique product. It incorporates any of our wide variety of sensors with a retractable cord. This feature enables you to protect displayed merchandise and to reduce the visible impact of unsightly cords. We can work with you or your fixture supplier to ensure an attractive, secure display. They are available in our standard size and the Space-Saving "D" version. The **Electronic Recoiler®** may be used as part of any of the Se-Kure Controls® Alarm Systems. Our "S" Hook and "C" Channel attachments also offer a simple, quick way to install recoilers within your fixture and to move them easily to alter the look of your display. The standard recoiler measures 2-1/8"W x 3-7/16"L x 3-7/16"H. The "D" Electronic Recoiler measures 1-11/16"W x 2-3/4"L x 2-3/4"H.

While only a few variations are shown here, please contact us to discuss your needs.

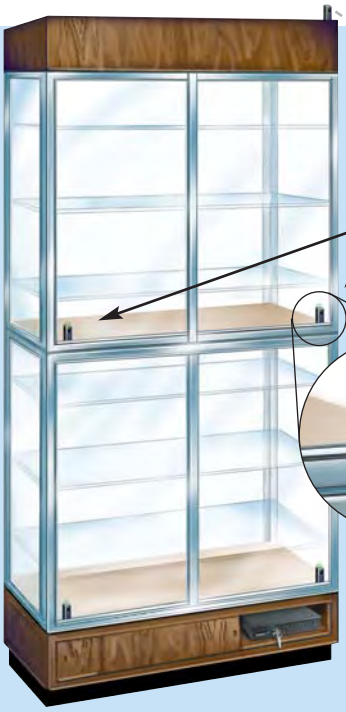
TALL GLASS ALARM

Display Case Security System



SK-1481IR Tall Glass™ Sensors

- Protects Up To 6 Doors
- Remote Control Operation
- Remote Horn Available

The Tall Glass Alarm is a keyless entry system **designed for all types of display cases**. Easily installed with ordinary tools, electronic sensors are placed inside the case by each door to detect movement. When unauthorized movement occurs, the sensors activate the alarm horn. By using the remote control, sales associates move the alarm system into Admit/Authorized mode, and can open the door for an allotted time and then close it. If the door is left open too long, the alarm horn sounds a warning. It gets sales associates in the habit of unlocking the door, getting what is needed and closing the door. Once the door is closed, the alarm system automatically resets, regardless of the time delay you have selected. This feature helps eliminate distraction theft.

Uses (6) "C" cell batteries for back-up, (not included).

- AC Powered with Battery Back-Up
- 30/60/90/120 Second Delay
- Management Key Control

ITEM NO.	DESCRIPTION
SK-1488IR	Tall Glass Alarm System Kit Includes: (1) Alarm Module, (1) AC/DC Power Supply, (6) Door Sensors & (1) Remote

TILT ALARM

Warns You of Unauthorized Item Movement

The Tilt Alarm can be attached to any item to alert you of any unauthorized movement. The Horizontal version can be used on countertop jewelry spinners. It allows them to be spun, but not picked up and moved without sounding the alarm horn. Operates on one 9-volt battery (not included).

- Available in Vertical or Horizontal Versions
- Low Battery Warning
- Compact Size: 4"L x 2-3/4"W x 7/8"D

- **Select From Four Different Sensors**
- **Up To 16 Months Of Battery Life**
- **Uses (6) AA Batteries** (Included)
- **Low Battery Alert**
- **Automatically Re-Arms**

The Klothing Kontrol Alarm is a unique, tamper-resistant warning system. It offers the widest variety of sensors available to protect garments. It incorporates a "visual memory" that keeps the LED's flashing until the tampered sensor is identified and corrected. **It is the most powerful alarm on the market with up to 16 months battery life.** If the alarm is triggered, the battery power is capable of sustaining a continuous alarm for up to 6-1/2 days! It has the "Where-Its-At" option, that flashes a light at the top of the display to help locate the source of the alarm. Its compact size allows protection without being visually obtrusive.

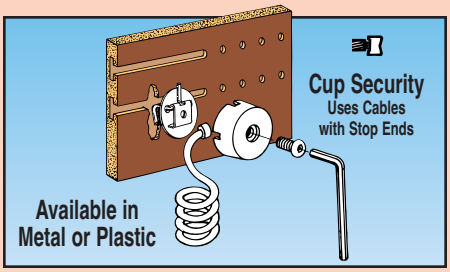
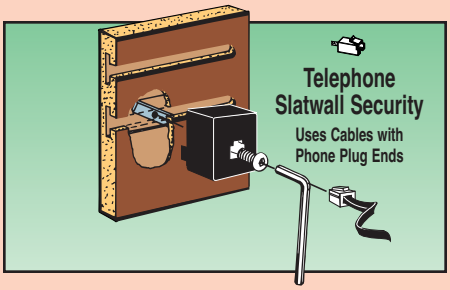
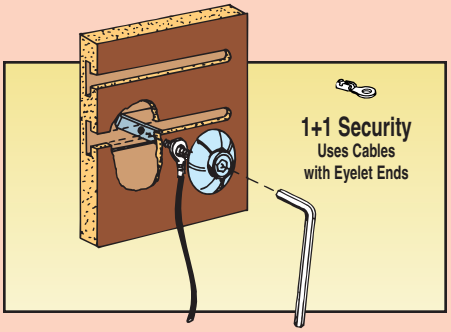
CABLE SECURITY SYSTEM

Versatile Mechanical Protection







Cup Security System

Operate by attaching the security cup to pegboard or slatwall. Attach cables to the merchandise to be protected and the other end of the cable connection into one of the slots in the security cup. Using the special Allen Wrench, the security cup is locked to the wall.

Phone Plug Security System

Add the ease and flexiblity of the phone plug to your cabling needs. The phone jack screws into the slatwall with a special security screw and cables plug right in.

1+1 Security System

This compact system easily attaches to slotted walls. Once the flat bar end of the 1+1 is inserted into the slatwall and turned clockwise, the bar turns to an angle which securely anchors the cables. Simply tighten with the special Allen Wrench to secure.

- **Lightweight**
- **Easy to Install**
- **Pressure-Formed Cell Cast Acrylic**
- **Less Than 1 *f*-stop Light Loss**
- **Panels Available Formed or Flat**
- **Dust Covers & Camera Brackets**

Smokie Domes provide a smartly designed theft deterrent that can be positioned and mounted with a camera or left empty. Shoplifters will never know which domes are "live." Choose from a variety of sizes and configurations. Formed panels, flat panels, 2' x 2', 2' x 4', or no panels at all, these domes fit easily into all standard drop ceilings.

Dust Covers are made from black Polystyrene and designed to fit on top of the CCTV dome. The light-weight cover helps to prevent dust from getting on the camera lenses and background light from disclosing the location of cameras.

WIRELESS ANNUNCIATOR

Audible Notification of Customer Entry

SK-22-310
Wireless Receiver

SK-22-315
Wireless Transmitter

- Easy to Install
- Traffic Counter Available

The Wireless Sensor/Annunciator System gives users time to prepare for guests and customers, as well as for unwelcomed visitors.

This unique system is ideal for use in retail stores, effectively providing convenience, peace of mind and improving customer service. As many as (3) transmitters can be used with one receiver. The receiver may be mounted up to 100' from the transmitters. When the transmitter detects a customer, it sends a signal to the receiver, which emits a tone. The optional counter enables you to monitor traffic flow and gauge the effect of advertising, promotions, displays, etc.

Versatile, battery operated motion detectors are always functioning, ready to transmit a wireless signal to the receiver upon detection of motion.
